

Software Development, Deployment & Maintenance Agreement

Laundry Operations Web Application / PWA

This Agreement establishes the commercial, legal, and service relationship between the Developer and the Client for the development and deployment of a mobile-first Web Application / Progressive Web Application (PWA) for laundry operations management, based in Preston, United Kingdom. The Client has separately provided a detailed Master Specification defining the application's features, workflows, and technical requirements, which serves as the primary functional reference for this engagement. This Agreement governs the commercial terms, responsibilities, timeline, and ongoing service relationship between the parties.

Agreement Date: [AGREEMENT DATE]

Development Period: 15 August 2026 – 15 September 2026

Project Reference, Scope & Responsibilities

SECTION 2

Project Reference & Scope

The Client has provided a separate Master Specification describing the intended functionality and requirements for the Laundry Operations Web Application. The Developer shall use the Client-approved specification, approved design mockups, and mutually agreed clarifications as the primary reference for development. The specification remains the primary functional reference; approved designs serve as the visual/UI reference. Any requirement not included in the approved scope may be treated as an additional change request, and significant changes may affect cost and/or timeline.

Project Details

- Project Name:** Laundry Operations Web Application
- Project Type:** Mobile-first Web Application / PWA
- Location:** Preston, United Kingdom
- Start Date:** 15 August 2026
- Target Completion:** 15 September 2026
- Development & Deployment Fee:** ₹35,000 INR

Developer Responsibilities

Design Prepare and present 3 initial design concepts/mockups at no additional charge; incorporate the Client's selected direction; develop the application according to the approved design; make reasonable design adjustments during the approval process.	Development Develop the agreed Website/PWA based on the Client's approved specification; implement agreed functionality and approved UI/UX design; integrate agreed third-party services; configure for production deployment; conduct reasonable development testing; correct identified implementation defects within the applicable support period.	Deployment & Handover Handle production deployment; configure the deployment environment; perform deployment verification; assist with initial production setup; provide reasonable information required for the Client to operate or maintain the delivered application.
--	--	---

Client Responsibilities

- Providing the final business requirements, project specification, and accurate business information
- Providing logos, branding materials, images, text, and all other content
- Providing required credentials and access for third-party services, hosting, and domains
- Reviewing designs and providing timely, clear feedback and approvals
- Reviewing delivered functionality and reporting issues clearly
- Ensuring all supplied content and materials can legally be used

❏ Delays caused by late Client responses, missing information, unavailable credentials, or delayed approvals may affect the project completion date. The Developer shall not be held responsible for such delays.

Design & Approval Process

SECTION 3

The Developer shall provide **3 initial design concepts/mockups at no additional design charge**. The Client shall select one design direction for refinement and formal approval before main development commences. Development should commence only after the Client provides reasonable approval of the selected design direction.

The approval process follows a clear sequential workflow: the Developer presents three initial concepts, the Client reviews and selects a preferred direction, the Developer refines the selected concept based on Client feedback, and formal Client approval triggers the commencement of main development.

What Is Included

- 3 initial design concepts/mockups — free of charge
- Incorporation of Client's selected design direction
- Reasonable design adjustments during the approval process

Chargeable Design Work

- Changes that materially alter the approved design may be treated as additional chargeable work
- Additional design concepts beyond the initial three may be chargeable if requested after the Client has reviewed and rejected the original concepts without a technical defect being present

Development Timeline & Deployment

SECTION 4

Stage	Target
Project Commencement	15 August 2026
Initial Design Concepts	Beginning of project
Client Design Review	After design submission
Design Approval	Before main development
Development	August – September 2026
Testing & Review	Before deployment
Production Deployment	Targeted by completion
Target Project Completion	15 September 2026

The Developer will make reasonable efforts to complete the project by **15 September 2026**. The target completion date is dependent upon timely Client approvals, availability of required materials, credentials, third-party services, and other Client dependencies. The Developer shall not be responsible for delays caused by external circumstances outside reasonable control.

Deployment – Developer Responsibility

Production deployment shall be handled by the Developer. The Developer will perform the agreed deployment of the Website/PWA, configure the deployment environment, perform reasonable deployment verification, and assist with initial production setup.

Deployment – Limitations

Deployment does not constitute a guarantee of hosting uptime, third-party API availability, payment provider availability, messaging service availability, domain provider availability, or external service performance. These services are controlled by independent providers.

Fees & Third-Party Costs

SECTION 5

₹35,000

Development & Deployment Fee

Agreed charge for the Developer's development and deployment services within the approved scope.

3

Free Design Concepts

Initial design concepts/mockups provided at no additional design charge.

7

Free Post-Deployment Days

Days of free post-deployment corrections and bug fixes for genuine defects.

Third-Party Services & External Costs

 **Important:** The ₹35,000 development and deployment fee does not include costs charged by third-party service providers. All third-party service charges, subscriptions, licences, platform fees, and usage-based costs shall be paid separately by the Client and shall not be deducted from or considered part of the development fee.

Client-Paid Third-Party Expenses

- Domain registration and renewal
- Hosting charges
- API charges and usage fees
- Payment gateway fees
- SMS, email, and WhatsApp/business messaging services
- Cloud services and database subscriptions
- SaaS subscriptions and software licences
- Paid plugins, libraries, and platform fees
- Maps/location APIs and storage charges
- Authentication service fees
- Any other third-party service required by the project

Developer's Position on Third-Party Costs

The Developer may assist with configuration or integration, but the Client remains responsible for all underlying subscription and service costs. If the Developer pays an approved third-party expense on behalf of the Client, it shall be reimbursed separately.

The Developer is not responsible for third-party price increases, service outages, API changes, provider policy changes, account suspension by third-party providers, or third-party service discontinuation.

Maintenance & Post-Deployment Changes

SECTION 6

7-Day Free Post-Deployment Period

After production deployment, the Client will receive **7 days of free post-deployment changes and bug fixes**. This period is intended for:

- Fixing genuine defects related to the agreed implementation
- Correcting implementation issues
- Minor adjustments required for the delivered scope

The free period does not constitute unlimited development work.

Monthly Maintenance – Optional

After deployment, optional ongoing maintenance shall be available at **₹3,000 – ₹5,000 per month**. The exact monthly amount will depend on:

- Amount of maintenance required and number of issues
- Technical complexity and maintenance workload
- Updates or fixes required

Maintenance and new feature development are separate. The monthly maintenance amount does not automatically include major new features or substantial changes; such work may be separately quoted.

Chargeable Future Changes

Any future change or feature addition requested by the Client after deployment may be charged separately based on complexity, technical requirements, and development effort. Where reasonably practicable, the Developer will provide an estimate or quotation before commencing substantial chargeable work.

New Features & Modules

New workflows, integrations, APIs, reports, and user roles

Major UI & Design Changes

New designs, major UI changes, additional pages or application sections

Database & Architecture

Major database changes and backend modifications

Expanded Scope

New business requirements, future expansion, and any work outside the approved scope

Future Development & Mobile Application

SECTION 7

The current Agreement is for the **Website/PWA** only. If the Client later requires a dedicated Android or iOS application, it will be treated as a separate future development requirement and is not covered under this Agreement.

Indicative Mobile App Pricing

Starting from ₹5,000 INR

The ₹5,000 amount is a starting/indicative development charge and may vary depending on the complexity and requirements of the mobile application. A separate quotation or change estimate shall be provided before mobile application development begins.

Factors Affecting Mobile App Cost

- Number of screens and mobile-specific UI
- Native functionality and device features
- Push notifications and GPS/location features
- Offline capabilities and API requirements
- Payment functionality
- Android/iOS-specific requirements
- Testing, App Store, and Play Store requirements
- Backend modifications and overall complexity

Mobile App – Separate Client Expenses

Developer Accounts

Google Play Developer account and Apple Developer account

Store Fees

App Store fees and Google Play Store fees

Technical Services

APIs, hosting, cloud services, paid SDKs, and subscriptions

Other Third-Party Costs

Any other third-party services required for the mobile application

Client Materials, Security & Responsibilities

SECTION 8

Client-Provided Materials

All materials supplied by the Client must be accurate, legally usable, in compatible file formats, and of appropriate quality and size. The Developer is not responsible for problems caused by incorrect Client content, copyright-infringing materials, corrupted or incompatible files, missing content, or late content submission.

Content Restrictions

The application shall not knowingly include destructive, crude, insulting, harassing, violent, sexual, unlawful, or otherwise inappropriate content. No invisible fields, hidden pages, concealed functionality, or undisclosed functionality shall be incorporated unless previously agreed by both parties.

Security & Data Loss Limitations

The Developer will implement reasonable, best-effort security measures appropriate to the agreed application. However, no software application can guarantee 100% protection from hacking, cyberattacks, vulnerabilities, malware, data breaches, or other security incidents.

The Developer is not responsible for data loss caused by hosting provider failures, Client misuse, third-party services, external cyber incidents, unauthorised Client actions, third-party provider failures, or incorrect Client data handling.

The Developer will not knowingly introduce malicious or hidden functionality.

Legal & Contractual Terms

SECTION 9

Intellectual Property

Ownership, licensing, and transfer of project-specific intellectual property shall be subject to the commercial understanding and applicable payment terms agreed between the parties. Client-provided materials, Developer-created work, open-source components, third-party libraries, APIs, frameworks, and external services are each subject to their respective ownership and licensing terms.

Confidentiality

Both parties shall maintain confidentiality with respect to business information, technical information, credentials, customer information, project information, commercial information, and non-public materials disclosed during this engagement. Both parties shall use reasonable measures to protect confidential information.

Limitation of Liability

The Developer shall not be liable for losses caused by third-party service outages, hosting failures, API failures, Client misuse, unauthorised Client modifications, incorrect Client data, external cyberattacks, force majeure events, or third-party platform changes.

Termination

Either party may terminate this Agreement at any time by providing written notice via email or certified mail to the other party. Upon cancellation, the Developer shall issue a final invoice for any unbilled time or materials. Work already completed, approved, or committed may remain payable according to the applicable commercial understanding.

Governing Law & Dispute Resolution

This Agreement shall be governed by the prevailing laws of India. Disputes should first be attempted to be resolved through good-faith communication. If the dispute cannot be resolved amicably, it shall be referred to neutral arbitration, subject to applicable Indian law.

Agreement Hierarchy

(1) This Agreement establishes the commercial, legal, and service relationship. (2) The Client's approved project specification defines the functional requirements. (3) Approved design mockups define the agreed visual direction. (4) Written change requests approved by both parties may modify the original scope. (5) If a requested change materially expands the scope, it may require additional charges and/or timeline adjustments.

Commercial Summary & Signatures

SECTION 10

Commercial Summary

Item	Agreed Term
Project	Laundry Operations Web Application / PWA
Development Start	15 August 2026
Target Completion	15 September 2026
Development + Deployment Fee	₹35,000 INR
Initial Design Concepts	3 — Free
Deployment	Handled by Developer
Post-Deployment Free Period	7 Days
Monthly Maintenance	₹3,000 – ₹5,000
New Features	Separately Chargeable
Domain, APIs, Hosting, Subscriptions	Paid Separately by Client
Future Android/iOS App	From ₹5,000; complexity-dependent
Mobile App Third-Party Costs	Paid Separately by Client
Governing Law	India
Dispute Resolution	Neutral Arbitration
