

VOLTRIX POWER SYSTEMS

Powering a Sustainable Future - B2B Product Catalog
Official Technical Specifications Brochure

RELIABLE GREEN POWER SOLUTIONS

Voltrix Power Systems provides high-efficiency power architectures, heavy-duty backup setups, and stabilizer installations built to secure machine life and reduce industrial operating overheads.

1. Servo Voltage Stabilizers (Single & 3-Phase)

Provides $\pm 0.5\%$ class voltage correction for CNC systems, laser cutting machines, lifts, commercial HVAC units, and advanced medical scanning equipment.

2. High-Capacity Active Inverters

Heavy-duty pure sine wave inverters with custom load profiles, catering to residential, retail, and commercial office grids.

3. Double-Conversion Online UPS

Pure sine wave online UPS configurations featuring true zero-millisecond switchover latency, ideal for backup storage centers and critical IT rooms.

4. Tall Tubular & Deep-Cycle Lead Storage Cells

High-density backing reserves built for deep cycles, offering extended lifespan and durability block designs.

5. Integrated Solar Power Generators

Smart grid Mono-PERC solar integrations equipped with state-of-the-art net-metering software and utility tools.
